Longitude 34° 23' West

Bark Hope Outward Bound 1850

Friday September the 27 all of this day fine pleasant weather
wind from the South West steering East by South six sails in sight
all bound to the eastward employed at ships duty and various
work about the ship clued up the main topsail and manded in
the foot of it and so ends this Day Latitude 39. 05 North
Longitude 32. 03 West

Saturday September the 28 first part of this day fine pleasant
weather wind from the south west ~~East by South~~ steering East
by south middle and latter the same at 4 PM saw the land Flores
at 10 PM. landed the boat and went on shore and got some eggs
and spoke the St George 28 day from New Bedford clean Capt. Thomas
and had a gam. The first one we have had since we been out
and most hellish rough landing the surge running mast head
high the last time we came from the shore and then got supper
and took a thundering good smoke and then turned in and thought
about going on shore the next day and getting our braines stove out
among the rocks and so ends this day Latitude 39. 28 North
Longitude 31. 07 West

Sunday September the 29 all of this day nice weather wind
from the south standing off and on and going on shore to trade
not quite so rough as it was the day before The St George in company
and so ends this day
Latitude 39. 26 North
Longitude 31. 07 West

Monday September the 30 all of this day strong wind from
the south and a heavy sea running went on shore for the last time
and the captain sent of a boat load of refreshments consisting of
potatoes and unions and hogs and eggs and pumpkins and various other
articles to numerous to mention and a host of natives came along with
it and after it was discharge we got rid of them and then were ship
heading East South East bound to payal the St George in company
and glad was i and i ges every body els was to get rid of the
hellish hole but we are bound to a nother not much better
but i hope we shall have a better time landing if not some
of us may lose the number of our mess and the devil will be
to pay and so ends this day Latitude 39. 26 North
we took on board three passengers at Flores Longitude 31. 07 West
for payal

Bark Hope Outward Bound 18 50

Tuesday October the 1 first and middle parts of this day fine pleasant weather wind from the south and variable latter part strong wind from the south west and squally and ragged and a heavy sea running figures graciosa and st george and fayal all in sight and the bark hope being to beat up to fayal and the ship st george in company and several other sails in sight but it is too tugging for the wind is right in our teeth sends this day

Latitude 37° 07 North
Longitude 28° 30 West

Wednesday October the 2 first and middle parts of this day strong wind from the south west and squally and rough and a heavy sea on and very uncomfortable the old bark on her beams end hull the time and the boys in the lee coppers and could not get up latter part more pleasant and the wind light at times and cloudy and dismal looking weather and sharp lightning in the north west and the st george still in sight and the ydeon howland 30 days out 30 lbs and the caniday in sight ^{and that is all we need} at 11 o'clock A.M. lowered the boat and went on shore at fayal and i stopt half an hour and then came on board with my brains turned up side down i got galben enough to last the voyage and sends this day Latitude 38° 30 North

Longitude 28° 42 West

Thursday October the 3 standing off and on in the harbor of fayal with a fine pleasant breeze and the captain sent of a boat to take the oil on shore and we had good luck landing it 70 lbs and that was all the good luck we did have at T.P.M. the boat came off and we were ship and stood out of the harbor and i was glad to get out of the land hole the wind was light and from the north 4 sails in sight sends this Day

Latitude 28° 03 North
Longitude 28° 28 West

Friday October the 4 all of this day light variable winds from all parts of the compass steering south S West and squally and rainy and disagreeable weather employed making out the fore and main hole and getting out water and stowing off one sail in sight sends this day

Longitude 28° 13 West

Saturday October the 5 all of this day light wind from the East south East steering South by West employed at various jobs about the ship and mending the part in different parts of the ship one young man fallen on board and one sail in sight sends this day Latitude 35° 11 North

Longitude 28° 16 West

Bark ~~Catana~~ Hope Outward Bound 1850

Sunday October the 6 all of this day light breezes from the East and south steering to the south and West employed painting the lab board boat and the carpenter cut a hole in the deck over the stowards pantry ^{And put on a ski light} so hee could see to mix up duff and had chickens for supper nothing in sight so ends this day
Latitude 34, 03 North
Longitude 28, 50 West

Monday October the 7 first part of this day light wind from the south and East steering by the wind to the southward and westward middle and latter parts wind light and from the southward and westward steering by the wind to the south East and squally bad weather with rain and a head beat sea on which made men at the head ^{mast} cast up there accounts and curse the day that was born the cooper employed making a big tub to set the minceing house in and the rest of the men employed at other work about the ship cut out boat sails for the lab board and mast boat so ends this day good noon
Latitude 33, 36 North
Longitude 28, 12 West

Tuesday October the 8 all of this day had squally dirty weather with rain wind light at times and some times hard puffs and then calm and then puff again and then rain and sun shine this ^{wind} was from the southward and westward steering by the wind to the south employed at ships duty bent the new harness cask and put a barrell of prime beef in to it the cooper still to work on on the big minceing tub and the carpenter making a sheer pole for the main rigger killed a western island pig the first one we have had sense we been out so ends this wonderfull Day I hope I shall have a good ^{appetite}
Latitude 32, 3 North
Longitude 27, 20 West

Wednesday October the 9 first part of this day strong breezes from the west middle and latter parts moderate gale from the north west steering south by west at 1 A M took in the jib gaff top sail and fore top gallan sail at 2 took in the main top gallan sail and at 4 A M put two reefs in the fore and main top sails and at 7 A M took in the jib and spanker and main sail blowing like thunder and squally with rain and sharp lightning and thunder at 10 A M took in the fore top sail and at half past 1 P M set it again still blowing strong employed at ships duty hewing out iron plates making scrub lincons and put the dogs down in the lubber room one dog fell down and hurt his top not but not dangerously he will recover so ends this day
Latitude 30, 22 North
Longitude 26, 22 West

Bark Hope Outward Bound 1850

Thursday October the 10 all of this day strong gales from the north west steering south S West and squally with rain rugged and disagreeable weather and a heavy sea running and one tremendous squall in which the men lost their hats over board. Men from their heads like a feather and i had to hold mi hair on to keep it from blowing off and i lost a part of it after all employed working ship and every thing els needfull and hard work to stand up on it down but all down about ten times in twenty minutes so ends this day blowing like to hit
Latitude 27° 56' North
Longitude 25° 54' West

Friday October the 11 first and middle parts of this day blowing a strong gale from the north west and tremendous squally with rain it would make the old hope tremble like a leaf all over latter part it moderated a little put sail on her and took it in again and quick employed fitting blocks straps for the davit tackle and pulling over the main hatch and getting wet and then sware a little and grin and bear it. This day steering South S West so ends this day i hope the next will be better ^{then}
Latitude 25° 19' North
Longitude 25° 33' West

Saturday October the 12 first and middle parts of this day strong gale from the north west steering to the South S West squally with rain and rugged latter part more pleasant wind light all sail set glad to see ~~more~~ pleasant weather again employe fitting a new main top gallan stay for the old one parted 8 weeks out pronounced good by the riggers fild the but so ends this day. Latitude 23° 00' North
one sail in sight. Longitude 25° 23' West

Sunday October the 13 all of this day light wind from the North West steering South S West with fine pleasant weather employed at ships duty saw a fin back killed a hog and had a lobster out on fresh pork nothing els so ends this day. Latitude 21° 21' North
Longitude 25° 26' West

Monday October the 14 all of this day fine pleasant weather wind light and from the North East steering South S West the trade winds employed at various duty about the ship putting up cheese and putting a little brandy on it and bending the top sails over on the starboard boats line over board and so ends this fine day. Latitude 20° 28' North
Longitude 25° 12' West

Bark Hope Courtward Bound 18 3 0

Tuesday October The 15th all of this day fine pleasant weather and light north east trade winds steering to the South & West employed at a little of every thing taring down the mizzen riggen and staving the head stays and fitting the collar of the main top gallan stay and several other jobs too numerous to mention and so ends this delightful Day shakespear
L H H 10 11 N

Latitude 19, 05 North
Longitude 25, 41 West

Wednesday October the 16 first and middle part of this day
light north East trade wind latter part strong Trades and
some cloudy steering South by West and south S West at
6 P M saw ^{de iselands} st anto no one of the cape de vin saw a sail in the night standing
to the Northward employed fitting riggin and painted the
starboard boats line tub and a little of every thing els witch
i shall not mention so ends this omnipotent Day what next

Latitude $17^{\circ} 15'$ North
Longitude $25^{\circ} 35'$ West

Thursday October the 17 first part of this day strong trade wind from the north east steering South by West middle and latter parts all sorts of trade calm and puffs from every point of the compass the trade that pharaoh had when hee forced moyses in to the red sea and got swamped and we like to have ben ourselves for the water came into our cabin windows at nine o'clock at night and the steward had to turn out of his bunk and bail it up but nothing dangerous employed fitting rigging and bracing out for water and provision one sail in sight caught a porpoise and the steward is making slaps looks out of his braines for supper and so ends this day

Latitude 16° 21' North
Longitude 25° 27' West

Friday October the 18 all of this day fine pleasant calm weather
light trade steering South by West employed at ships duty saw black
fish towed the labboard and waist boats and ~~cast~~ ^{hoisted} two and took
them along side and hoisted them in and got supper and then went
to work in clearing them away. The second mate got his foot cutt bad
with an iron gantlee the hoops on the line tub and panted the
labboard boats line tub and the cooper putting staves in to the
big mincing tub sends this calm hot Day Latitude 15° 36' North

Longitude 25.26 West

Bark Hope Outward Bound 1850

Saturday October ^{the} 19 all of this day fine pleasant hot calm weather and light variable trade winds steering South logs in sight one of the Cape de Verde islands employed bowling out two black fish and some to work on the sailing file and the carpenter making line stands to set the tubs on and painted the waist boats line tubs and the sailors to work on the rigging so ends this day hot as fire

Latitude 14° 30' North

Longitude 25° 25' West

Sunday October the 20 all of this day pleasant weather and light variable wind what we call trades but the air not so warm as make the best of it steering South saw a fin back and a ship standing to the northward with all sail set so ends this Sunday ^{seen}

Bark Hope Outward Bound 1880

Friday November the 15 all of this day unfill bad weather
wind from the north East and from the north N East and
steering south by west and south. Severe and terrible squally
with rain rain in abundance employed at a few light Zobs between
squalls several sails in sight spoke the manoella and had a gam
so ends this miserable dark rainy disagreeable squally Day
Latitude
No observation Longitude

Saturday November the 16 all of this day the worst kind
of weather the wind variable from the north to the East
with tremendous squalls of rain and a heavy sea running to the
East steering south East by East employed working ship and
trying to keep from getting wet but it was an impossibility
for the windows of heaven was open and the rain fell
tremendously and so ends this miserable dark squally Day
Latitude 21 00 South
No observation Longitude

Sunday November the 17 all of this day a strong gale
from the north East steering south East and a heavy
sea running to the east and tremendous squally with rain
employed working ship and taking in sail for we could
do nothing else put the starboard boat on the upper
crows for the old bark was on her beams end half the
time and it was blowing terrible and raining like
thunder all the time one sail in sight and nothing else
but wind bags and black clouds hanging over us
so ends this uncomfortable londs Sunday
Latitude
No observation Longitude

Monday November The 18 all of this day a terrible storm
The wind from the north and north East and a very
heavy sea on and tremendous squally with rain the worst
weather that i ever saw steering south East under short
sail employed working ship and hanging on put the
waist boat on the upper crows nothing in sight but
water above and below so ends this disagreeable bad
Day blowing and raining like smoke Latitude
No observation Longitude

Bark Hope Outward Bound 1850

Tuesday November the 19. first part of this day again from the north and terrible squally with rain in middle and latter parts it moderated and the wind shifted to the west north west and left a heavy sea on and the old bark roiled tremendously but the moon and stars made there appearance and we had a pleasant night of it steering south East employed brakeing out for provision and drying our jackets so ends This Day.

Latitude 26° 12 South
Longitude 30° 30 West

Wednesday November the 20 all of this day moderate breezes from the southward and clear weather and a terrible sea on steering to the southward and Eastward employed brakeing out the fore hole after corn meal and flour nothing in sight but it is very cold so ends this Day the sun shining

Latitude 26° 56 South
Longitude 28° 50 West

Thursday November the 21 all of this day light variable wind from the south East to the south west steering by the wind heading south S west and East south East and clear weather most of the time with a few drops of rain and cold employed fitting ship so ends this day Latitude 27° 12 South Longitude 29° 31 West

Friday November the 22 all of this day a strong breezes from the East and south East steering by the wind heading to southward and westward and clear weather and cold employed fitting ship and cleats stroking harpoons and several other jobs too numerous to mention so ends This Day nothing in sight

Latitude 29° 04 South
